Nakon svečanog predavanja 15.3.2015. godine, San Diego, SAD, formiran je 34. Ogranak Američkog koledža kardiologa za Srbiju i Republiku Srpsku, čiji je prvi guverner postao Prof. dr Milan A. Nedeljković.

After inaugural lecture, on March 3, 2015 in San Diego USA, the 34th ACC Chapter for Serbia and Republic of Srpska was established, with Professor Milan A. Nedeljkovic as a first governor.

Poštovane kolegkinice i kolege, dragi prijatelji,

Izuzetna mi je čast i zadovoljstvo da vas, u ime kardiologa Republike Srpske i Srbije, pozdravim i poželim toplu dobrodošlicu na Jedanaesti kongres 34. Ogranka Američkog koledža kardiologa (ACC) za Srbiju i Republiku Srpsku – PRAC SIS 2026. Ove godine se okupljamo na olimpijskoj planini Jahorini, u hotelu Termag, nastavljajući tradiciju koja traje još od 2015. godine.

Ove godine ne slavimo samo novi naučni susret, već i više od decenije postojanja i vizije koja je naš ogranak učinila prepoznatljivim mostom između najnovijih svjetskih preporuka i njihove praktične primjene u našem regionu. Sadržaj ovogodišnjeg programa ostaje vjeran prepoznatljivom PRAC SIS konceptu: praktična primjena i komparativna analiza najnovijih ACC/AHA i ESC preporuka.

Naučni program je pažljivo koncipiran da pokrije najkritičnije tačke savremene kardiologije, nove smjernice i inovacije. Analiziraćemo najnovije ACC/AHA preporuke iz 2025. godine za akutni koronarni sindrom, arterijsku hipertenziju i urođene srčane mane. U kontekstu tehnološkog napretka razgovaraćemo o primjeni vještačke inteligencije (AI) kao i o najnovijim metodama u elektrofiziologiji. Kada su u pitanju strukturne bolesti srca posebno smo ponosni na sesiju posvećenu razvoju TAVI programa u Republici Srpskoj, čime hvatamo korak sa najsavremenijim evropskim centrima. Integrisanim pristupom od tretmana gojaznosti prema stavovima ACC-a i ESC-a, preko rješavanja "Gordijevog čvora" plućne hipertenzije, pa sve do kardiohirurških inovacija, naš cilj je sveobuhvatna briga o pacijentu.

Program je dodatno obogaćen učešćem eminentnih međunarodnih stručnjaka, a posebnu novinu predstavlja premijerno organizovanje okruglog stola na temu prevođenja pretkliničkih istraživanja u svakodnevnu kliničku praksu. Izuzetno nam je zadovoljstvo što će u ovoj diskusiji, pored naših istaknutih stručnjaka, učestvovati i uvaženi gosti iz inostranstva, čime direktno podstičemo globalnu razmjenu znanja.

Zahvaljujem se na svesrdnoj podršci Udruženju kardiologa Srbije, Udruženju kardiologa Republike Srpske, Medicinskim fakultetima u Beogradu i Banjoj Luci, te resornom Ministarstvu zdravlja i socijalne zaštite Republike Srpske. Iskrenu zahvalnost dugujemo i farmaceutskoj industriji čija je podrška važna za realizaciju ovog skupa.

Nadam se da će vam program biti profesionalno inspirativan, a boravak na Jahorini ugodan i ispunjen dragocjenim kolegijalnim susretima.

Prof. dr Tamara Kovačević Preradović
Predsjednik / Guverner 34. ACC Ogranka
za Srbiju i Republiku Srpsku

Dear colleagues, dear friends,

It is my great honor and pleasure to greet you on behalf of the cardiologists of the Republic of Srpska and Serbia and to wish you a warm welcome to the Eleventh Congress of the 34th American College of Cardiology (ACC) Consortium Chapter of Serbia and Republic of Srpska – PRACSIS 2026. This year, we gather on the Olympic mountain Jahorina, at the Termag Hotel, continuing a tradition that has successfully lasted since 2015.

This year, we do not only celebrate a new scientific meeting, but also more than a decade of existence and a vision that has made our Chapter a recognizable bridge between the latest global recommendations and their practical application in our region. The content of this year’s program remains true to the recognizable PRACSIS concept: practical application and comparative analysis of the latest ACC/AHA and ESC guidelines.

The scientific program is carefully designed to cover the most critical points of modern cardiology, new guidelines, and innovations. We will analyze the latest 2025 ACC/AHA recommendations for acute coronary syndrome, arterial hypertension, and congenital heart disease. In the context of technological progress, we will discuss the application of Artificial Intelligence (AI), as well as the latest methods in electrophysiology. Regarding structural heart diseases, we are particularly proud of the session dedicated to the development of the TAVI program in the Republic of Srpska, by which we are keeping pace with the most modern European centers. Through an integrated approach—from the treatment of obesity according to ACC and ESC positions, to untying the “Gordian knot” of pulmonary hypertension, and all the way to cardiac surgery innovations—our goal remains comprehensive patient care.

The program is further enriched by the participation of eminent international experts, and a special novelty this year is the premiere organization of a round table on the topic of translating preclinical research into everyday clinical practice. It is our great pleasure that, alongside our prominent experts, distinguished guests from abroad will also participate in this discussion, thereby directly encouraging the global exchange of knowledge.

I would like to express my gratitude for the wholehearted support of the Cardiology Society of Serbia, the Cardiology Society of the Republic of Srpska, the Faculties of Medicine in Belgrade and Banja Luka, and the relevant Ministry of Health and Social Welfare of the Republic of Srpska. We also owe sincere gratitude to the pharmaceutical industry, whose support is vital for the realization of this gathering.

I hope that the program will be professionally inspiring for you, and your stay on Jahorina pleasant and filled with valuable collegial encounters.

Prof. Dr. Tamara Kovačević Preradović President /
Governor of the 34th ACC Chapter for Serbia
and Republic of Srpska
